## BANK OF NEW ZEALAND:

# Automating time-consuming manual processes

*“submit individual spreadsheets on up to 13 different types of data”*

### THE CHALLENGE

- BNZ's carbon capture and reporting process was heavily reliant on spreadsheets
- Immense time pressure at reporting time with only 6 weeks to gather all data from suppliers, collate, analyse and comment on trends and submit individual spreadsheets on up to 13 different types of data
- Each spreadsheet had to contain all source data, emission factors, commentary and approval and ensure the correct version of the file was being passed around
- Reviewing and approving the data was extremely time-consuming, unreliable, open to human error and in some cases wasn't possible at all
- Management and board didn't have confidence in the accuracy and reliability of the emissions report and figures presented to them

### WHY BRAVEGEN?

Store all information in a centralised place

Complements existing systems

Tools for long and short term planning

Create reports that include all necessary data

Information is accessible to mobile devices

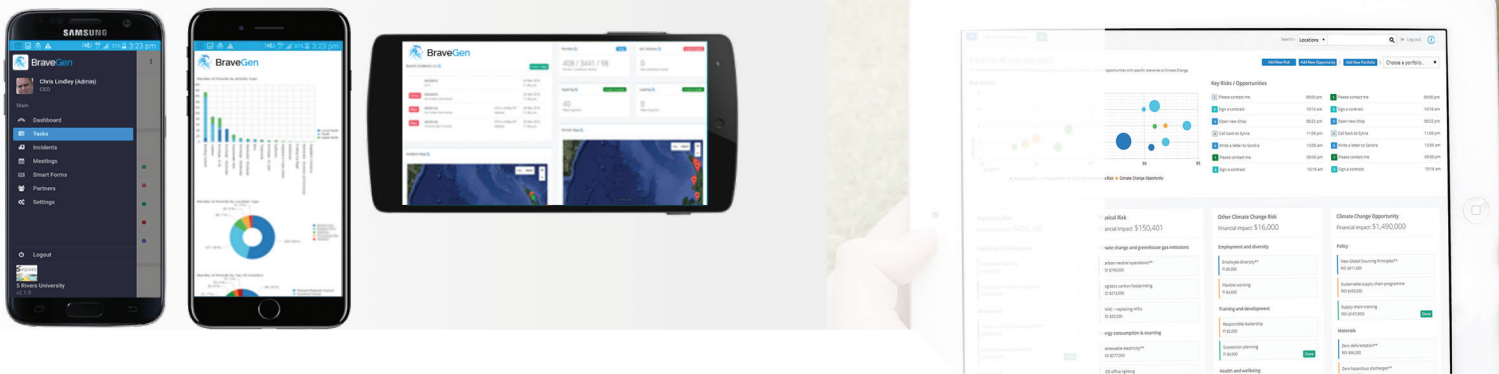

Receive training to get the most out of the software

### BACKGROUND

Bank of New Zealand (BNZ) is one of New Zealand's largest banks.

It employs over 5,000 people and operates a nationwide network of 180 retail stores and business centres. BNZ must report its carbon footprint, energy use and water consumption twice yearly to its parent company.

*“BraveGen accurately diagnoses one of the biggest pain points in sustainability reporting and provides a viable, innovative solution*

– Jessica Rodger

## THE SOLUTION

BraveGen provides BNZ with one source of truth satisfying all aspects of carbon reporting. The bank has now visibility of the entire emissions profile, all of the emission sources, all of the base data, all of the emissions factors and carbon dioxide equivalents.

BNZ is now able to perform analytical and historical comparisons, at any level of detail the bank wants to review it.

Utilizing a smart approval process and automated notifications ensures activity data from internal and external suppliers is received, reviewed and approved on time.

BraveGen completely transformed the process and provides BNZ with the level of governance and oversight to feel confident that the data is absolutely right.

## INTERESTING FACTS

- BNZ uses the solutions' Asset Manager to track emissions, maintenance and resource usage of thousands of ATMs, vehicles and HVAC units
- Departments within BNZ use the solutions' business intelligence capabilities to consume KPIs and analyse trends through personalised dashboards

## BENEFITS

- ✓ Streamlined data collection
- ✓ Captured corporate knowledge of suppliers and staff to aid reporting processes
- ✓ Single real-time view of aggregated data for global wide reporting
- ✓ Increased confidence in the accuracy of data
- ✓ Global solution deployed in just 6 weeks to support 11 subsidiaries
