## Z ENERGY LTD:

# More efficient data reporting and analysis

*“the existing data management and reporting process was not sufficient to do what they required”*

### THE CHALLENGE

The main challenge for Z Energy was managing its electricity, water and waste data.

The company wanted to analyse and benchmark data at corporate, site and retail levels. To do this, they were using a combination of spreadsheets to complete the process.

Senior Management recognised that the existing data management and reporting process was not sufficient to do what they required and needed an urgent overhaul.

They sought a solution that provided a single view of the data with the functionality to analyse and report information at all levels within the organisation.

### BACKGROUND

Z Energy (previously, Shell Oil New Zealand) is a retail fuel provider with over 300 sites throughout New Zealand. Each site is owned by one of 22 retail companies.

Z Energy are a top 20 publicly listed company. They directly employ over 300 people and indirectly a further 2,200 through their retail network. They own a stake in New Zealand's only refinery at Marsden Point and sell around 48% of New Zealand's total transport fuel.

### WHY BRAVEGEN?

Store all information in a centralised place

Complements existing systems

Tools for long and short term planning

Create reports that include all necessary data

Information is accessible to mobile devices

Receive training to get the most out of the software

*“Z’s purpose is to solve what matters for a moving world. At Z, we reckon sustainability matters and we’re committed to acting in a way that benefits the future of the communities we operate in. BraveGen provides the management tools for Z to achieve our goals.”*

– Gerri Ward,  
Sustainability Manager,  
Z Energy.

## THE SOLUTION

Z Energy engaged BraveGen in discussions for a possible solution for their data management and reporting requirements.

BraveGen provided a “proof of value” concept using historical data to demonstrate how our software would collect, aggregate and display their data.

Using BraveGen’s automated data collection systems and sophisticated Business Intelligence tools, Z Energy was able to increase the speed and accuracy of reporting and provide detailed reporting to key stakeholders.

## INTERESTING FACTS

- Former competitors include Chevron subsidiary Caltex of which Z Energy acquired in June 2016.
- Z Energy use BraveGen’s award winning business intelligence platform to build ad-hoc reports across their 22 retailers.
- Z Energy use BraveGen’s Report Mapper module to develop their GRI G4 sustainability reports.

## BENEFITS

- ✓ Streamlined data collection
- ✓ Z Energy are able to report against GRI G4 standards in 2015 using data from BraveGen
- ✓ Single real-time view of aggregated data for global wide reporting
- ✓ Increased confidence in the accuracy of data
- ✓ Moving forward with the acquisition of another fuel provider (Caltex), simple and straightforward integration with new data suppliers into the system for the additional retail outlets
